Forecast for Tuesday 30 May 2023

Weather: Any lingering low cloud at first quickly clearing. Another fine day with largely unbroken sunshine. A little less breezy than on Monday and feeling warmer.

Chance of cloud-free hill tops above 800m: 90% around dawn, increasing to 100% by early morning.

Low Cloud and visibility: Perhaps the odd patch around 300m at first but routes above 700m likely to remain above any cloud. This soon dissipating during the morning to give very good visibility with distant peaks in clear view.

Forecast for Tuesday 30 May 2023

Height (m)	Wind Speed mean/gusts (mph)				Wind Direction (blowing from)

*Level above which ground is expected to be frozen/snow is expected to settle.

Meteorologist's View

UV levels will be high again on Tuesday so adequate sun protection is required. Feeling warm in the sunshine, especially in valleys so bring plenty of water.

Forecast for Wednesday 31 May 2023

Weather: Low cloud covering many eastern hills and some central upslopes early morning, although highest summits are likely to remain above the cloud. This clearing by mid-late morning to leave a fine, sunny and rather warm day.

Maximum wind: Easterly 10-20mph, with gusts 25-30mph.

Chance of cloud-free hill tops above 800m: 80% at first, mainly east. Becoming 100% by the afternoon. Lower levels obscured by cloud during the morning, however.

Low Cloud and visibility: Cloud obscuring some routes above 400m at first, especially in the east, however most routes above 800m remaining above the cloud, perhaps briefly becoming obscured as cloud lifts during the morning. Cloud soon clearing all summits and dissipating by midday to give very good or excellent visibility.

Temperature: **Valleys:** Plus 8 Celsius rising to Plus 21 Celsius
At 800m: Plus 5 Celsius rising to Plus 13 Celsius
Freezing level: Above summits
